Folks: Just checking in. I believe we received the revised Wallace Yard and Hercules Mill RAD drawings on Friday, but have not received same for Spur Lines. I thought we reached a conceptual deal for that last week (follow the EE/CA, apply FROWW exclusions), so expected the Spur Lines revisions to be fairly straightforward (I made my own revision with marker on hardcopy).

Did we miss some submittal from Sara or is there any reason for this delay? We are working today to respond to the revisions we did receive on Friday.

At this point, I'd still love to see signatures today or tomorrow, as we anticipated last week, but I'm not holding my breath.
